

MM Enterprises Digital Commerce Platform — Product Requirements Document (PRD)

1. Product Overview

Product Name

MM Enterprises Digital Commerce Platform

Business Type

Authorized dealer platform for:

- Mobiles
- Electronics
- Furniture
- Home appliances

Objective

Build a premium digital commerce platform that helps MM Enterprises:

- Showcase products online
- Generate customer inquiries
- Increase offline and WhatsApp sales
- Manage products/admin operations internally
- Build a trusted online brand presence

The platform should initially function as a hybrid commerce platform rather than a full Amazon-style ecommerce system.

2. Product Vision

Create a modern, premium, enterprise-grade platform combining:

- Product showcase website
- Lead generation system
- Admin management dashboard
- Analytics system

The experience should feel:

- Premium

- Trusted
- Modern
- Fast
- Mobile-first

Reference feel:

- Apple
 - Reliance Digital
 - Samsung Store
 - Croma-style minimalism
-

3. Target Audience

Primary Users

Retail Customers

People searching for:

- Mobiles
- TVs
- Refrigerators
- Washing machines
- ACs
- Furniture

Local Buyers

Customers who:

- Want to visit store physically
 - Need price inquiries
 - Prefer WhatsApp communication
 - Compare products before purchase
-

4. User Roles

Role 1 — Public Users (Customers)

Customers can:

- Browse products

- Search products
 - Filter by category/brand
 - View product details
 - Contact via WhatsApp/call
 - Submit inquiry requests
 - View offers
 - Visit showroom details
-

Role 2 — Admin

Admin can:

- Login securely
 - Manage products
 - Manage categories
 - Upload banners
 - Add offers
 - Manage brands
 - View customer inquiries
 - View analytics dashboard
 - Manage homepage content
-

5. Core Features

Public Website Features

5.1 Homepage

Sections

- Hero banner
- Featured products
- Brand showcase
- Trending offers
- Categories
- Why choose MM Enterprises
- Store location/contact
- WhatsApp CTA

Goals

- Build trust
- Showcase brands

- Generate inquiries
 - Increase showroom visits
-

5.2 Product Catalog

Categories

- Mobiles
- TVs
- Refrigerators
- Washing Machines
- Air Conditioners
- Furniture
- Kitchen Appliances
- Accessories

Features

- Product cards
 - Product image
 - Price display
 - Discount badges
 - Brand labels
 - Availability status
-

5.3 Product Details Page

Product Information

- Product title
- Brand
- Specifications
- Price
- EMI availability
- Product gallery
- Features
- Description

CTA Buttons

- Call Now
 - WhatsApp Inquiry
 - Visit Store
 - Request Quote
-

5.4 Search & Filters

Filters

- Category
- Brand
- Price range
- Availability
- Popular products

Search

- Live search suggestions
 - Keyword matching
 - Mobile-friendly search
-

5.5 Brand Showcase

Brands

- LG
- Samsung
- Whirlpool
- Haier
- Voltas
- OnePlus
- Vivo
- Oppo

Goal

Increase trust and brand authority.

5.6 Inquiry System

Customer Actions

Customers can:

- Submit inquiry forms
- Request callback
- Contact via WhatsApp
- Request best price

Admin Receives

- Customer name
 - Phone number
 - Product interested in
 - Inquiry timestamp
-

Admin Dashboard Features

6.1 Admin Authentication

Features

- Secure login
 - JWT authentication
 - Protected routes
 - Role-based access
-

6.2 Product Management

Admin Actions

- Add product
 - Edit product
 - Delete product
 - Upload product images
 - Assign category
 - Assign brand
 - Set pricing
 - Mark featured products
-

6.3 Banner Management

Admin Actions

- Upload homepage banners
 - Add festival offers
 - Manage promotional content
-

6.4 Brand Management

Admin Actions

- Add brands
 - Upload brand logos
 - Manage authorized dealer list
-

6.5 Inquiry Management

Admin Views

- All customer inquiries
- Product interest tracking
- Contact information
- Inquiry status

Inquiry Statuses

- New
 - Contacted
 - Converted
 - Closed
-

6.6 Analytics Dashboard

Dashboard Metrics

- Total inquiries
- Most viewed products
- Top categories
- Product performance
- Customer engagement
- Popular brands

UI Requirements

Dashboard should match premium AIRIS dashboard design system.

7. UI/UX Requirements

Design Language

Style

- Premium
- Clean
- Minimal
- Enterprise-grade
- Soft shadows
- Rounded cards
- Spacious layout

Avoid

- Cluttered marketplace feel
 - Too many colors
 - Heavy gradients
 - Outdated admin template UI
-

Brand Color System

Purpose	Color
Primary	Deep Navy
Accent	Gold
Hover	Orange-Gold
Background	Soft White
Cards	White with subtle shadows

Typography

Style

- Modern sans-serif
 - Strong hierarchy
 - Clean spacing
 - Large hero typography
-

Mobile Responsiveness

The platform must be:

- Fully responsive
 - Mobile-first
 - Optimized for Android devices
 - Fast loading
-

8. Technical Architecture

Frontend

Framework

Next.js

Reason

- SEO optimized
 - Fast performance
 - Server-side rendering
 - Scalable architecture
-

Backend

Framework

FastAPI

Responsibilities

- Authentication
 - Product APIs
 - Inquiry APIs
 - Admin APIs
 - Analytics APIs
-

Database & Storage

Platform

Supabase

Usage

- PostgreSQL database
 - Product image storage
 - Authentication
-

Deployment

Layer	Platform
Frontend	Vercel
Backend	Railway
Database	Supabase
Storage	Supabase Storage

9. Database Models

Users

 - created_at
-

10. SEO Requirements

Must Have

- SEO-friendly URLs
- Meta tags
- Product schema markup
- Optimized images
- Fast page load
- Mobile optimization

Goal

Rank locally for:

- Mobile shops
 - Electronics stores
 - Furniture dealers
 - Appliance stores
-

11. Performance Requirements

Targets

- Lighthouse score above 90
 - Fast mobile loading
 - Optimized images
 - Lazy loading
 - CDN image delivery
-

12. Security Requirements

Requirements

- JWT authentication
 - Protected admin routes
 - Input validation
 - Rate limiting
 - Secure image uploads
 - Role-based permissions
-

13. Future Roadmap

Phase 1 — MVP

- Public website
 - Product management
 - Inquiry system
 - Admin dashboard
 - Brand showcase
-

Phase 2

- Analytics improvements
 - WhatsApp automation
 - Offer engine
 - Advanced filters
 - Customer accounts
-

Phase 3

- Shopping cart
 - Online payments
 - Order management
 - Delivery tracking
 - Inventory management
-

14. Success Metrics

Business Metrics

- Inquiry count
- Product views
- WhatsApp clicks
- Showroom visits
- Conversion rate

Technical Metrics

- Page speed
 - Uptime
 - SEO rankings
 - Mobile performance
-

15. Recommended Development Plan

Step 1

Build:

- Landing page

- Product catalog
 - Admin login
-

Step 2

Build:

- Product management
 - Inquiry system
 - Supabase integration
-

Step 3

Build:

- Analytics dashboard
 - Brand management
 - Offers system
-

Step 4

Optimize:

- SEO
 - Performance
 - Mobile UX
 - Deployment
-

16. Final Recommendation

MM Enterprises should launch initially as a:

Hybrid Commerce Platform

Meaning:

- Products visible online
- Customers inquire online
- Final sales handled offline/WhatsApp

This approach:

- Reduces complexity
- Minimizes deployment cost
- Avoids payment/delivery overhead initially
- Scales naturally into full ecommerce later

This is the recommended architecture for MM Enterprises at startup stage.
